Hardware

Description

Pull Handle: The YKK AP SmartPull is proprietary designed and innovatively styled as an extruded aluminum 1" diameter canted offset pull with 9" O.C. mounting. The open style assists with handicapped access and permits easy access to the lock cylinder.

Push Bar: The YKK AP SmartPush is an innovative 1" diameter push bar designed to help ensure the safety of building occupants. The unique design subtly directs the user to push on the correct side of the door so as not to impede egress from the building.*

* Minimum door width is 27"
